| Ivna came prepared with valuable slides, handout, and interactive exercises all within an hour session. Her presentation style was enjoyable and the time was high value and went quickly. I have actionable items to try out with my team in the 3 voices of assertive communication. |
| I don't care for 'interactive' sessions that require breaking out in small groups during an informational session. Having said that, overall, it was very interesting and there were some great takeaways.   |
| Ivna was amazing. She used collaboration to drive home her points and the class was able to share amongst one another about our challenges to open communication.  |
| She was great communicator and presenter.  |
